Sauce:
https://www.zerohedge.com/markets/north-korea-assumes-warlike-posture-cuts-all-contact-south
"North Korea Assumes 'Warlike' Posture, Cuts Off All Contact With South"
"Virtually overnight, the thaw in inter-Korea relations apparently ended, and hostility reemerged, as the North Korean leadership announced plans to cut off all communications, including an emergency hotline, in retaliation against South Korea allowing defectors to send propaganda leaflets back across the border.

For several days, North Korea has lashed out at the South Korea over the defector leaflets, which have been a semi-permanent feature of inter-Korea relations, and have long angered Pyongyang.

Over the past few days, the North hreatened to close an inter-Korean liaison office and other projects if the South does not stop defectors from sending leaflets and other material into the North. Several leaders quoted in the North Korean press said the "work" toward the south should change into "one against an enemy."

Top government officials in North Korea, including leader Kim Jong Un's sister, Kim Yo Jong, and Kim Yong Chol, vice-chairman of the Central Committee of the ruling Workers' Party of Korea, determined "that the work towards the South should thoroughly turn into the one against an enemy," KCNA said."

FRANKENFOOD used to Frankenstein the planet, all in the name of Food Security?
This is not sound.
>"...The Insect Allies program was announced by DARPA in 2016. It is a research project that aims to protect the U.S. agricultural food supply by delivering protective genes to plants via insects, which are responsible for the transmission of most plant viruses. Scientists believe loading the bugs up with viruses that would offer plants protective benefits could be one way of ensuring food security in the event of a major threat...
...Instead, scientists with DARPA are looking at introducing genetically modified viruses that can edit chromosomes directly in fields—these are known as horizontal environmental genetic alteration agents..."
Monsanto crops have been doing this for a long time, by stealthy altering the dna of even organic crops via cross-breeding.
>WHY Darpa felt the need to IMPROVE on that horror is beyond me. Oh, wait. Silly me. DARPA!
There you have it. Gov't programs lthat have their hands in all manner of nasty business.

Pure coincidence. No such thing.
> 26. Defendants have created AI systems that can take in humanities facial, voice and other bio-metric information and decode whether they are resistant to AI, subject to its control, atheist or have a faith. This technology can enable AI, or any entity using AI to track, profile, hunt and kill targets it deems resistant to its control or resistant to AI. This can be done with drones, machines, robotics, or poison delivery systems such as Micro-Botic terrorism.

>RED VOTING AREAS TO CHECK FOR PAST DEMOCRATIC REGISTRATION BEFORE ALLOWING NEW RESIDENTS.
I didn't want this part to flounder in the wake of other business here.
Personally, I am interested in seeing HOW that degree of vetting will play out.
It would cross into the very procurement of Real Estate, even on thee rental side.
>very interesting.

>better we discover it first. then know how to flip it
Well, I believe we did, but, lost on the backend.
Monsanto's Round-up caused the company to sell out to Germany's BAYER, after court rulings proved that Monsanto's glycophosphates are responsible for all manner of human diseases, including those that altered human immune systems, with death being the final assault on weakened humans.
>logic would say that these agricultural missteps be condemned and banned
Unfortunately, all they did was allow it to continue under new cover.
>Once /we/ get to the point where THE HEALTH of humanity is something to be reckoned with, we will need to go back to pre-laboratory man-made argricultural and animal husbandty practices.
THE PLANET GOES STRICTLY ORGANIC, no more obese humans riddled with disease.
The bad part is that glycophosphates and their gmo counterparts are now in the wild. It will probably take generations for a complete cleansing of the soils on Planet Earthmto achieve this.
>the only way to flip it, is to use common sense as quickly as possible. Modern Agriculture has never been our friend.

There is no coup. Coups are relatively fast and generally happen over night. The ideal time for US coup would have been over the weekend with riots and supposed bum rush of white house. Also, the riots aren't really becoming too terrible. I would have expected rioters to have guns/home made explosives. Then again, left are retarded and know nothing about guerilla tactics.
